

Part VIII

STATISTICS

REPORT FROM THE CONFERENCE STATISTICIAN

This report is the amalgamation of the year end statistical reports provided to the Annual Conference by each of the Florida churches. While providing accurate data is first the responsibility of the local church, the District AAs carefully review each year-end statistical report for accuracy and reasonableness before releasing them to the conference for further review. I especially want to thank each member of the district staff who worked so hard to provide accurate information and the skilled conference staff as well.

Each year as church staff changes, the accumulation of accurate data becomes more suspect. This year there was great effort expended to provide instructions for the completion of the year end statistical report. I want to give special thanks to Jessica Michel, Janet Kelley, Julie Bullerdick and Maggie Corrigan who spent countless hours working on the instructions. In order for the data to have relevance, each church must provide the same information in each of the various tables. Having coherent instructions is crucial to insure the data is accurate. Jessica, Janet, Julie and Maggie, thanks again for caring enough to spend the extra time on this project. While this report cannot fully reflect the effectiveness of the mission and ministry of the church, it is utilized by many and is the basis for decisions made at every level in the connection.

I would be remiss if I didn't raise up Diana Herchig, Director of Data Management. Without her leadership, attention to detail and tireless commitment none of this could be possible.

Milton E. Wilson, Year Ending December 31, 2009

NOTE: Every quadrennium the Committee on Official Forms and Records meets and re-evaluates the statistical forms and makes changes as needed. Two-thousand nine (2009) was the beginning of a new quadrennium that will be in effect from 2009-2012. Many significant changes were made to the 2009 year-end statistical report which included the removing of questions, adding new questions and changing the wording of a question. Because of this, line numbers and questions for 2009 data will not necessarily line up with previous years.

For a more detailed comparison of the changes, as well as answers to questions about how the data is used and who uses it, please visit the statistics section of the General Council on Finance and Administration website (www.gcfa.org/stats.html) and click on "Comparisons of New Statistics Forms to the Previous Version" under the heading "*What has changed?*" or "*A Guide to the Users of Local Church Statistics Gathered*" under the heading "*Who uses this data?*"

STATISTICAL TABLES - NEW THIS YEAR! All local church statistical information collected for the year 2009 is now available to all local churches in an Excel spreadsheet. Local churches can access the Excel spreadsheet through their local church log-in via the Conference Website (www.flumc.org). The Excel spreadsheet is laid out by district, with a recap of district and conference totals. Having it in an Excel spreadsheet will enable users to search and sort the data as needed. All local church statistical information collected for the year 2009 is also available in PDF format on the Conference website (www.flumc.org) and the 2010 CD Rom Journal for easy printing.

In an effort to reduce printing and mailing costs, and to provide the data in a more useable format, you will not find the traditional pages of statistical tables in the printed version of the Journal. However, a printed copy of all local church statistics has been provided to the General Council on Finance and Administration, the General Commission on Archives and History, and several printed copies are kept at the Conference Center.

Included in the following pages are statistical highlights for the year 2009, as well as all local church year-end statistics (for the year 2009) arranged by district, with district and conference totals at the very end.

*This figure included corrections to the previous year's data until 2009. In 2009 the corrections to the previous year's data was broken out as a separate question. That figure was 2,277. This helps explain the large decrease from 2008 to 2009.
